

Griffin Millender

Android Software Engineer

CAREER OBJECTIVE

As an accomplished Android Developer, I'm driven by a passion for creating exceptional mobile experiences. With over 11 years of expertise, I specialize in developing robust and secure Android applications that prioritize performance, user satisfaction, and innovation. My skills encompass security protocol implementation, efficient coding practices, proficiency in Java, Kotlin, and Python, as well as adept project management using Git, Jenkins, and Jira. Through collaborative leadership and a commitment to excellence, I've consistently exceeded client expectations and led core product teams. My objective is to continue contributing to the evolving landscape of Android development by leveraging my innovation and expertise to deliver outstanding results.

EXPERIENCE

Senior Android Engineer

Copperhead, Toronto, Canada

March 2018–Present

- Utilizing an in-depth understanding of the Android framework to identify and address performance bottlenecks, resulting in a smoother user experience for CopperheadOS users.
- Designing and implementing robust security measures to safeguard mobile applications against potential vulnerabilities and cyber threats, contributing to the platform's reputation for superior security.
- Conducting rigorous code reviews to ensure the quality, consistency, and integrity of the Android codebase, fostering a culture of excellence among the development team.
- Leading the core product team, collaborating closely with cross-functional teams to drive innovation, prioritize feature development, and ensure alignment with business objectives.
- Effectively managing and addressing client feature requests, translating user needs into actionable development tasks and maintaining high levels of client satisfaction.

Android Developer

Swift Themes, USA

January 2018 – June

2019

- Collaborated with UI/UX designers and product managers to implement creative features and enhancements in the Swift Themes Android application.
- Implemented efficient algorithms and data structures to optimize the performance of the application, ensuring a smooth and engaging user experience.

Android Developer

SlimROMs, USA

Jun 2012 – May 2018

- Championed and led core project maintenance, orchestrating efforts to ensure the project's stability, reliability, and continuous enhancement.
- Collaborated extensively on device bring-ups, forging valuable partnerships with hardware manufacturers and leveraging the open-source community to provide unparalleled custom ROM support across a diverse array of devices.
- Engineered and meticulously maintained a suite of Android applications that enriched the user experience for our dedicated community of SlimROMs enthusiasts.
